The ISO 20345 Standard distinguishes safety footwear with an "S" (Safety / Safety), defining it as:

Footwear with features dedicated to protecting the user from damages that may result from accidents in the workplace for which the work footwear has been intended. Equipped with a protective toe cap that protects the foot from impacts equivalent to an energy of 200 J.

SLIP RESISTANCE CODES

SRA	Slip resistance tested on ceramic tile wetted with dilute soap solution
SRB	Slip resistance tested on smooth steel with glycerol
SRC	Slip resistance tested under both the above conditions

ESD CEI EN 61340-5-1 REGULATIONS

ESD footwear (ElectroStatic Discharge)

According to the IEC EN 61340-5-1 requirements intended to be used as a complement to other equipment within Electrostatic Protection Areas (EPA).

These work environments occur in the manufacture of electronic circuits in which static electricity can cause damage to them. The floors, clothes, tools, tables, machinery, environment, etc. of these areas are also ESD. ESD equipment has a yellow and black identifying icon. It is a particular
